PROFESSIONAL PROFILE

Economist with more than twenty-five years of experience in economic development, territorial competitiveness, investment attraction, economic intelligence and public policy design. Master in Business Economics and Bachelor in International Economics from the Universidad Autónoma de Chihuahua, with a specialization in Regional Development, executive training at the University of California San Diego (UCSD) and at the Economic Development Institute of the University of Oklahoma. He has complemented his education with international programs in artificial intelligence, data analysis, sustainability, circular economy, Business Intelligence and technology leadership delivered by institutions such as the University of Pennsylvania (Wharton), Vanderbilt University, DeepLearning.AI, University of Michigan, University of London, CAF, CIMAV and Tableau.

Throughout his career he has coordinated strategic projects for governments, business organizations, universities and research centers, participating in the development of industrial clusters, regional competitiveness strategies, strengthening of production chains, investment attraction, university–industry collaboration and economic planning. He has driven initiatives in competitive intelligence, economic observatories, indicator analysis and information platforms for decision-making, integrating data science, artificial intelligence and advanced analytics tools.

He currently serves as Deputy Director of Industry for the Municipality of Chihuahua, where he leads projects aimed at strengthening the industrial ecosystem, supplier development, attracting national and international investment, economic promotion and designing strategies to consolidate Chihuahua as a competitive, innovative city prepared for new technological and productive trends.
